Open to Remote Opportunities

Full-Stack Software Engineer | React, Next.js, TypeScript | Node.js, PostgreSQL, Supabase

PROFESSIONAL SUMMARY

Full Stack Software Engineer shipping production web applications and client projects since 2022. Leads React and Next.js UI delivery for data-heavy dashboards and e-commerce experiences, with reusable component systems, typed data fetching, and clear UI state handling. Brings full-stack scope across REST APIs, Node.js, Supabase, relational data, authentication, RBAC, and production deployment.

TECHNICAL SKILLS

Frontend: React, Next.js (App Router), React Native, JavaScript, TypeScript, Tailwind CSS, shadcn/ui, TanStack React Query, HTML5, CSS3
Backend/APIs: Node.js, Express.js, REST APIs, Supabase, NextAuth.js, Stripe API/Webhooks, PHP
Databases: PostgreSQL, MySQL, MongoDB | **Auth/Security:** JWT, RBAC, Row Level Security (RLS)
Testing: Jest, React Testing Library | **DevOps/Tools:** Docker, Git, GitHub Actions, Vercel, CI/CD
Practices: Responsive and mobile-first development, reusable UI systems, UI state management, SSR, API integration, performance optimization, Debugging, Problem-Solving | **CMS:** WordPress

PROFESSIONAL EXPERIENCE

Co-Founder / Full Stack Software Engineer | Mina Technologies | Addis Ababa, Ethiopia | Jul 2022 – Present

- Lead frontend engineering across concurrent client engagements, building reusable UI systems for data-heavy admin dashboards and customer-facing e-commerce applications.
- Standardize component patterns for forms, tables, and modals plus TanStack React Query data fetching and UI states for loading, error, and empty results.

Selected Client Projects at Mina Technologies

Full Stack Developer (Part-time Contract) | Super Start GYM | Jul 2022 – Dec 2022

- Built a local PHP, MySQL, and Bootstrap gym system for customer profiles, subscriptions, payments, QR-based attendance, renewal and expiry tracking, and reporting.

Frontend Developer (Part-time Contract) | Blue Best Trading | Mar 2023 – Apr 2023

- Delivered a responsive Next.js and Tailwind single-page marketing site with structured content and a contact-page interface.

Full Stack Developer | Palm Real Estate | Sep 2024 – Feb 2025

- Combined property listing and inventory workflows in one Next.js dashboard with reusable components, REST API integration, CRUD validation, filtering, pagination, and RBAC.

Frontend Developer | Bahran Inventory (Tsehay Paints) | Feb 2025 – May 2025

- Built a responsive inventory management dashboard UI in Next.js + Tailwind CSS with reusable components (tables/forms/modals), API consumption for products/stock workflows, client-side validation, advanced filtering + pagination, and role-based UI/route guards (admin/storekeeper/sales) aligned with backend RBAC.

Frontend Developer | Mina Property Management ERP | Sep 2025 – Present

- Build Next.js ERP modules for units, tenants, contracts, requests, payments, and reporting using Tailwind CSS and TanStack React Query.
- Create scalable patterns for filters, paginated tables, detail views, multi-step forms, modals, and drawers; integrate APIs through typed query and mutation hooks.

Frontend-Focused Software Engineer | Ethio HomeDepot | Apr 2025 – Present

- Built 20+ mobile-first responsive screens for a multi-vendor e-commerce product across discovery, listings, cart, and checkout using Next.js, React Native, and Tailwind CSS.
- Implemented React Query caching and state synchronization to reduce redundant requests and keep UI state consistent; built role-based experiences for customers, suppliers, drivers, and super admins.

SELECTED PROJECTS

Personal Project | Task Management System | Aug 2026 – Nov 2026

Live: my-task-management-system.vercel.app | Code: github.com/Alazar-da/task-management-system

- Built a full-stack task and project management platform using Next.js, React, TypeScript, Supabase, PostgreSQL, Tailwind CSS, shadcn/ui, and TanStack React Query.
- Designed an 8+ table PostgreSQL schema with RLS and role-based access control for admins, members, and viewers; implemented cached data fetching, Kanban, List, Calendar, real-time collaboration, and analytics dashboards.

ADDITIONAL CONTRACT EXPERIENCE

Full Stack Web Developer Intern | Addis Ababa Science and Technology University | Addis Ababa, Ethiopia | Jan 2022 – Apr 2022

- Built an admin results dashboard for the Online Exam Administration System and added ranking, filtering, Excel export, and Chart.js visualizations using PHP, MySQL, and Bootstrap.

Full Stack Developer (Part-time Contract) | Bookstore CRUD Management System | Jun 2023 – Aug 2023

- Built a Next.js, TypeScript, Tailwind, and MongoDB admin system with search and filter UI, reusable forms, and standardized loading, error, and empty states.

Web Developer (Contract) | Hailes Mojito Bar | Jun 2024 – Sep 2024

- Built a responsive PHP and Tailwind single-page site and a PHPMailer contact form with server-side validation and user feedback states.

Full Stack Developer (Contract) | Power Bet Settlement Management System | May 2026 – Jul 2026

- Built a Next.js 15 and Supabase settlement platform that automated weekly reconciliation previously handled in Excel; added validated file ingestion, cashier-agent matching, and commission and partial-payment logic.
- Delivered server-side filtering and pagination, a Chart.js analytics dashboard for revenue and agent performance, and NextAuth.js RBAC for admin and agent tiers.

Full Stack Developer (Contract) | AMANAH Corporate Advisory | Jun 2026

- Delivered a corporate website end to end in one month using Next.js App Router, SSR-friendly pages, image optimization, SEO structure, responsive navigation, and contact-email integration.

EDUCATION

BSc, Electro-Mechanical Engineering | Addis Ababa Science and Technology University | Sep 2019 – Jun 2024

CERTIFICATIONS

Meta Front-End Developer Professional Certificate, Coursera | May 2023 – Jan 2024
Create a Website Using WordPress: Free Hosting & Sub-domain, Coursera | May 2023
