Open to Remote Opportunities

FULL STACK SOFTWARE ENGINEER (React/Next.js, TypeScript, PostgreSQL)

PROFESSIONAL SUMMARY

Full Stack Software Engineer with hands-on experience building and deploying production web applications across e-commerce, financial operations, real estate, and business platforms. Strong in React, Next.js, TypeScript, PostgreSQL, REST APIs, authentication, RBAC, and modern frontend architecture. Co-founder and software engineer at Mina Technologies, contributing primarily to frontend development while also working across backend integration and application workflows. Additional experience delivering independent contractual projects involving financial reconciliation, authentication, dashboards, SEO, and production deployment. Currently expanding backend and cloud expertise across Node.js, NestJS, Prisma, Docker, CI/CD, AWS, and React Native.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3, PHP
Frontend: React, Next.js (App Router), React Native, Tailwind CSS, shadcn/ui, TanStack React Query, Bootstrap
Backend: Node.js, Express.js, REST APIs, Supabase, NextAuth.js, Stripe API/Webhooks
Databases: PostgreSQL, MySQL, MongoDB
Authentication & Security: JWT, RBAC, Row Level Security (RLS), authentication/authorization
Testing: Jest, React Testing Library
DevOps & Tools: Docker, Git, GitHub Actions, Vercel, CI/CD
Practices: Responsive/mobile-first development, SSR, API integration, database design, performance optimization, reusable component architecture, Agile
CMS: WordPress

PROFESSIONAL EXPERIENCE

MINA TECHNOLOGIES — Co-Founder / Full Stack Software Engineer | Addis Ababa, Ethiopia | Jul 2024 – Present

- Delivered full-stack web applications for clients across e-commerce, fintech, real estate, and corporate services through custom-scoped, sometimes concurrent contracts, leading frontend engineering while integrating backend APIs and core application workflows.

Selected Client Projects (Mina Technologies)

Palm Real Estate — Property & Inventory Management System — Full-Stack Developer | September 2024 – February 2025

- Built a combined property listing and inventory tracking platform (Next.js, React, Tailwind CSS, REST APIs), unifying two previously separate workflows into one dashboard.
- Implemented CRUD-based property and inventory modules with role-based access controls for different admin levels.
- Designed reusable, modular front-end components to support future feature additions without rework.

Ethio HomeDepot — Frontend-Focused Software Engineer | April 2025 – Present

- Designed and built the mobile-first UI for a multi-vendor e-commerce platform (Next.js, React Native, Tailwind CSS), delivering 20+ responsive pages spanning marketplace discovery, listings, cart, and checkout.
- Implemented data fetching and caching with TanStack React Query, replacing ad-hoc fetch calls to reduce redundant network requests and keep UI state consistent across pages.
- Built role-based interfaces for four user types (customers, suppliers, drivers, super admins), each with distinct navigation and permissions.
- Deployed the app to both web and native mobile via React Native

Selected Independent Contracts

Power Bet — Settlement Management System — Full-Stack Developer (Contract) | May 2026 – July 2026

- Built an internal settlement platform (Next.js 15, TypeScript, Supabase) automating weekly financial reconciliation across multiple gaming systems, replacing a manual Excel-based process.
- Implemented Excel ingestion with validation and cashier-agent matching, plus commission and payment calculation logic supporting partial payments and payment history tracking.
- Added server-side filtering and pagination for large settlement datasets, and built an analytics dashboard (Chart.js) covering revenue trends and agent performance.
- Implemented authentication and role-based access control with NextAuth.js for admin and agent user tiers.

AMANAH Corporate Advisory — Full-Stack Developer (Contract)| June 2026

- Delivered a corporate website for a Dubai-based advisory firm end-to-end, from design implementation to deployment, within a one-month engagement.
- Built the site on Next.js App Router with server-side rendering and image optimization for performance and SEO.
- Implemented a contact form with email integration, an interactive service showcase, and a responsive navigation system including a mobile drawer menu.

Addis Ababa Science and Technology University | Full Stack Web Developer Intern | Addis Ababa, Ethiopia | January 2022 – April 2022

- Extended the university's Online Exam Administration System, building an admin results dashboard (PHP, MySQL, HTML/CSS, Bootstrap).
- Implemented student ranking, grade statistics, filtering, and Excel export features, plus data visualization with Chart.js.

PROJECTS

Task Management System | Personal Project | August 2026 – Present

Live demo: my-task-management-system.vercel.app | Code: github.com/Alazar-da/task-management-system

- Designed and built a full-featured task and project management platform solo (Next.js 15, TypeScript, Supabase, shadcn/ui), covering user dashboard, project workspaces, and team collaboration tools.
- Designed the PostgreSQL schema with 8 core tables and Row Level Security, implementing role-based access control for project admins, members, and viewers across tasks and projects.
- Integrated real-time task updates via Supabase real-time channels, enabling instant drag-and-drop board updates and collaborative task management across team members.
- Built an interactive task board with drag-and-drop, calendar view, and an analytics dashboard covering task completion rates, project distribution, and team productivity metrics.
- Delivered 3 view modes (Kanban, List, Calendar) backed by 8 database tables with RLS policies and 12+ API service modules, with 4 task statuses and 4 priority levels.

EDUCATION

BSc, Electro-Mechanical Engineering — Addis Ababa Science and Technology University | Addis Ababa, Ethiopia | Sep 2019 – Jun 2024

CERTIFICATIONS & CONTINUED LEARNING

Meta Front-End Developer Professional Certificate — Coursera | May 2023 – Jan 2024

Create a Website Using WordPress: Free Hosting & Sub-domain — Coursera | May 2023
